

## **AnotherPin Co. is an online store that aims at selling high-quality clothing pins.**

We do not yet have a company branding, so we will need both the web design and the website development. The features we need for our new website are as follows:

- A Customer should be able to navigate the website and purchase an item without needing to create an account.
- A Product must have a title, price, description, and up to 5 pictures.
- Only Admin Users should be able to create, edit, update and delete products.
- Admin Users should be able to feature a product on the main page.
- Admin Users should be able to mark a product as sold-out so that it is no longer displayed on the webpage.
- Admin Users should be able to create, edit, update and delete new admin users.
- Admin Users should be able to create, edit, update and delete orders.
- A Customer should be able to purchase using credit card information.
- A Customer should be able to add multiple items to the shopping cart.
- A Customer should be able to update the number of items in the shopping cart.
- A Customer should be able to remove items from their shopping cart.
- A Customer should receive an e-mail with a thank you message and order details in case their purchase is successful.
- The website should be hosted and we should be able to access it using a domain.

We are looking for an estimated project cost and a timeline.

Thank you,

The AnotherPin Co. team
